

6516206288.txt

I purchased XM Radio due to poor programming and signal strength of local stations. There is no reason why XM should not be allowed to broadcast traffic and weather on a local basis. This is very similar to the issues raised with satellite television. I pay for the service and deserve and should have the option of local services. Please reject the NAB's petition 04-160.
Sincerely,

Mark Ross
